 - Built a responsive React frontend with state management.
 - Deployed on Vercel (frontend) and Render (backend).

Internship Experience

- game development – Immersive skills academy, Duration- 30 hours
- game development with Unity hub

I am a final-year BCA student and an aspiring MEAN/MERN stack developer with a strong passion for coding and real-world development. I am currently seeking opportunities to gain hands-on experience by working on real-life projects that allow me to apply and expand my skills. While I do need to support my semester fees, I prioritize project experience and learning above all else. I am highly motivated, sincere, and truly dedicated to growing as a developer. I believe I am a strong candidate because I value the opportunity to work and learn more than the job title or pay. If compensation is not possible at this stage, I am still fully willing to contribute and work without payment, as my primary goal is to gain practical experience and build a strong foundation for my future in tech.

Education

Full Stack Development
Entri Elevate
2024 - 2025

Bachelor of Computer Applications (BCA) ongoing(final year)
Sahrdaya College of Advanced Studies, University of Calicut
